- Designed, built, and 100% tested in the USE

ION 200/400

Sparkling Water Option

Indulge your healthy lifestyle with the healthy alternative to soft drinks. We provide the first 10lb CO2 tank on us! Each tank is good for around 3,000 glasses.

Unlimited Cooling Capacity

No more waiting for more cold water. Stonybrook's InstaChill Technology provides non-stop, ice cold water.

Freshly Filtered

With ION, your drinking water is always bottle-free and equally important - it's freshly filtered. Many bottleless water coolers have reservoirs or storage tanks that hold water for week or even months.

Water Quality

It's all about clean water. ION's bottleless design transforms ordinary tap water with CarbonPlus filtration, to reduce chlorine, taste, odor, lead, cysts, and more .

10 x	Offering 10x the cooling capacity of a standard office
80 	Dispenses up to 80 glasses in 40 minutes
42°	Perfect temperature
